DETAILED ACTION

Claim Objections

1. Claim 10 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim 10 has not been further treated on the merits.

Specification

2. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3723

4. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Preston 6,196,911 in view of Breivogel et al, 5,547,417. '911 discloses the claimed invention (please refer to columns 4 lines 50 through column 7, lines 34) except for the use of adjustors to adjust the difference in height with respect to the dressing face between reference planes. '417, in a similar device, figure 2a, teaches the use of adjuster **236** attached to abrasive grit tips. It would have been obvious to one of ordinary skill to have provided '911 with the adjusters taught by '417, column 5, lines 35-60, to allow for uneven wear or the replacement of the abrasive segments.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar devices are cited of interest.
